Summary

Hi, I'm Rafael! Ever since my first line of code, I've been fascinated by how data can drive decisions and transform businesses. Today, I specialize in building scalable data solutions for industry leaders like Nestlé, Smartfit, and L'Oréal, leveraging Python, PySpark, SQL, and Google Cloud Platform (GCP) to turn raw data into actionable insights.

My expertise includes:

- Designing & optimizing data pipelines in cloud environments (GCP) for efficiency and scalability.
- Automating ETL/ELT processes to streamline data ingestion, transformation, and storage.
- Ensuring pipeline reliability through proactive monitoring and performance tuning.
- Collaborating cross-functionally with analytics, marketing, and product teams to deliver data-driven solutions.

I'm passionate about solving complex problems with clean, efficient architectures and thrive in dynamic environments where I can both learn and contribute.

Experience

WPP Media Services

📅 November 2024 – Present

Data Engineer

📍 Curitiba, PR

- Develop and optimize data pipelines in cloud environments, primarily using Google Cloud Platform (GCP).
- Automate data ingestion, transformation, and storage processes (ETL/ELT) to ensure efficient and scalable data flows.
- Monitor and perform preventive maintenance on pipelines to ensure stability and high performance.
- Collaborate with multidisciplinary teams (analytics, marketing, product) to design and implement data-driven solutions focused on strategic insights.

SAFE7

📅 February 2024 – November 2024

Data Engineer

📍 Curitiba, PR

- Analyzed business contexts and developed solutions to maximize productivity.
- Refactored and modeled a new database structure.
- Developed "Safe7 Toolkit," an internal web tool centralizing processes and serving as a viewer/manager for work-flows.
- Built ETL pipelines using GCP services with Python, web scraping, and REST APIs.

Mirum Agency

📅 August 2023 – December 2023

Data Engineer Intern

📍 Curitiba, PR

- Maintained and interpreted code used in ETL/ELT processes.
- Configured and maintained GCP cloud services.
- Created SQL queries and supported the BI team.
- Developed Python endpoints for connecting with media APIs (TikTok, Twitter, Pinterest, Google Ads).
- Provided client support, account maintenance, and service monitoring.

Education

UniDomBosco

📅 April 2022 – Present

Bachelor's in Systems Analysis and Development

📍 Curitiba, PR

Centro Estadual de Educação Profissional de Curitiba

Technical Degree in Electromechanics

📅 January 2018 – January 2022

📍 Curitiba, PR

Skills

- **Languages:** Portuguese (Native), English (Professional).
- **Technologies:** Python, PySpark, AirFlow, SQL, MongoDB, MySQL, GCP.
- **Expertise:** Data Pipeline Design, ETL/ELT Automation, Cloud Architecture, Performance Optimization.
